NeoColab_REC_CS23231_DATA STRUCTURES

REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

```
Input: a b c -
Output: Forward Playlist: a b c
Backward Playlist: c b a
Answer
#include <stdio.h>
#include <stdlib.h>
struct Node {
char item;
  struct Node* next;
  struct Node* prev;
}:
// You are using GCC
void insertAtEnd(struct Node** head, char item) {
 struct Node*newNode=(struct Node*)malloc(sizeof(struct Node));
 newNode->item=item:
 newNode->next=NULL;
 newNode->prev=NULL;
 if(*head==NULL)
  *head=newNode;
   return;
```

```
struct Node*temp=*head;
while(temp->next!=NULL)
   temp=temp->next;
 temp->next=newNode;
 newNode->prev=temp;
void displayForward(struct Node* head) {
  struct Node*temp=head;
  while(temp!=NULL)
   printf("%c",temp->item);
    temp=temp->next;
  printf("\n");
void displayBackward(struct Node* tail) {
  struct Node*temp=tail;
  while(temp!=NULL)
    printf("%c",temp->item);
    temp=temp->prev;
  printf("\n");
void freePlaylist(struct Node* head) {
  struct Node*temp=head;
  while(temp!=NULL)
    struct Node*nextNode=temp->next;
    free(temp);
    temp=nextNode;
  head=NULL;
                                              241801290
int main() {
struct Node* playlist = NULL;
  char item;
```

241801290

241801290

```
24,801290
                                                            24,180,1290
          ...e (1) {
scanf(" %c", &item);
if (item == '-') {
while (1) {
scarf/"
             break;
          insertAtEnd(&playlist, item);
        struct Node* tail = playlist;
        while (tail->next != NULL) {
          tail = tail->next;
printf("Forward Playlist: ");
displayForward(playlist)
        }
                                                                                          24,180,1290
        printf("Backward Playlist: ");
        displayBackward(tail);
        freePlaylist(playlist);
        return 0;
     }
     Status: Correct
                                                                                  Marks: 10/10
